## 2. WOOL.

The total production of wool in New South Wales was 546,273,000 lb. in 1939-40; 536,908,000 lb. in 1940-41; 547,000,000 lb. in 1941-42; 497,538,000 lb. in 1942-43; 537,410,000 lb. in 1943-44, 448,683,000 lb. in 1944-45 and 431,549,000 lb. in 1945-46.

The Australian wool clips 1939-40 to 1945-46 were purchased by the British Government under war time contract. The current clip is being sold by auction under agreement between United Kingdom, Australia, New Zealand and South Africa for joint disposal of accumulated stocks and safeguarding of prices of new wool.

The index may be regarded as an approximate measure of changes in the volume of business transactions settled by cheques provided it is considered in conjunction with changes in price levels. It represents the ratio of each month's clearings to the average for the month concerned during the five years 1926-1930. This average is represented by 100 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is, the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels. The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

## 23. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.
